

MICROSOFT DYNAMICS 365 CRM AND POWER PLATFORM TECHNICAL CONSULTANT

PROFESSIONAL SUMMARY

- Dynamics 365 CE and Power Platform Technical Consultant with 5+ years of experience delivering enterprise CRM solutions, improving operational efficiency by up to 40–70% across multiple projects.
- Automated BOQ (Bill of Quantities) processing using Power Platform, AI Builder, and custom prompts, reducing manual effort/processes by up to 80% and improving data accuracy.
- Delivered standalone Power Pages projects, building dynamic, data-driven portals using Liquid templates, Web Templates, Entity Lists (including custom implementations), and Portal Web API, with authentication via Azure AD B2C and Microsoft Entra ID.
- Strong expertise in solution design and customization using C# plugins, workflows, and Power Automate to streamline business processes.
- Advanced hands-on experience in C# plug-ins, custom APIs, Power Apps, and Dataverse, enabling faster processing and improved system performance.
- Extensive experience integrating Dynamics 365 with Azure and third-party systems, including large-scale data migration using SSIS (KingswaySoft), improving data consistency and reducing integration delays by up to 30%.
- Proven ability to lead technical workshops, translate business requirements into scalable solutions, and support clients through design, development, deployment, and post-go-live optimization.
- Strong understanding of security models, ALM practices, and enterprise CRM best practices within Agile delivery environments.
- Strong experience in Dynamics 365 CE development, configuration, and production support, including debugging C# plugins, resolving integration issues, and keeping enterprise CRM systems stable and running smoothly.

TECHNOLOGIES & SKILLS

Microsoft Dynamics 365 & Power Platform

Dynamics 365 CRM (Sales, Customer Service) | Power Apps (Canvas & Model-Driven) | Power Automate | Power Pages / Power Portals | Dataverse | Business Rules | Workflows | Ribbon Workbench | Custom Pages | AI Builder | Microsoft Copilot | Power Platform Pipelines | CE/CRM Customization | Solution Architecture | Technical Consultant.

Development & Programming

C# | .NET Framework | ASP.NET Web Forms | ASP.NET MVC | ASP.NET Web API | Windows Forms | Console Applications | LINQ | C# Plugins | Custom Workflow Activities | Web Resources | JavaScript | jQuery | Knockout JS | TypeScript | Power FX | HTML/CSS | JSON | XML | Liquid Template | FetchXML | SDK

Integration & Automation

Power Automate | Azure Logic Apps | Azure Functions | Azure WebJobs | Webhooks | SSIS (Kingsway Soft) | REST APIs | SOAP APIs | OData APIs | SharePoint Integration | HubSpot Integration | Dow Jones Integration | Microsoft Graph API | Custom Actions | Code Activities | Azure AD B2C | Microsoft Entra ID (Azure AD) Authentication & SSO | Power Pages Authentication Configuration

Database, Reporting & Security

SQL Server | Dataverse | Database Design | Data Migration | SSRS (SQL Server Reporting Services – Enterprise Reporting) | SQL Server Agent Jobs | Azure Blob Storage | Role-Based Security | Field-Level Security | GDPR Compliance.

Version Control & Tools

Git | Azure DevOps | TFS | Jira | Visual Studio | XrmToolBox | Visual Studio Code

Governance & Delivery

Application Lifecycle Management (ALM) | Fit-Gap Analysis | Business Process Re-engineering (BPR) | Functional Requirement Documents (FRDs) | Requirement Analysis | Agile/Scrum | Stakeholder Engagement | Client Training | Business Process Reengineering.

PROFESSIONAL/WORK EXPERIENCE

INC Group – Riyadh, Saudi Arabia**Power Platform Technical Consultant****Jun 2025 – Present****Responsibilities:**

- Led the design and delivery of enterprise Dynamics 365 and Power Platform solutions supporting digital transformation across estimation, licensing, and core operations.
- Designed scalable Dataverse data models and defined solution architecture with strong focus on performance, security, and governance.
- Built and managed C# plug-ins, workflows, business rules, and custom logic to support complex business processes.

- Developed Model-Driven and Canvas Apps, automated workflows using Power Automate, and implemented AI Builder with custom prompts, reducing manual effort by 70% and improving accuracy.
- Designed and implemented integrations between Dynamics 365, Azure Functions, and external systems to ensure seamless and reliable data flow.
- Established development standards and governance practices to deliver secure, stable, and scalable enterprise solutions.

DataInvent Systems – Ontario, Canada

Microsoft Dynamics 365 CRM & Power Platform Technical Consultant | Power Pages Lead

Jun 2023 – May 2025

Responsibilities:

- Designed and delivered secure Power Pages portals integrated with Dynamics 365, Dataverse, and external APIs to support enterprise client operations.
- Customized Dynamics 365 using C# plug-ins, JavaScript, and Power Automate to streamline processes and improve user productivity.
- Built Model-Driven and Canvas Apps with enterprise integrations using REST, SOAP, Web API, and custom connectors.
- Implemented Azure Functions to enable real-time integration and scalable backend processing.
- Established governance standards and performance optimization practices to ensure stable and maintainable Power Platform environments.
- Developed Power BI dashboards to provide business insights and support data-driven decisions.
- Provided post-deployment support for enterprise CRM systems, troubleshooting and resolving production issues related to integrations, authentication, and workflows.

Scaleable Solutions – Islamabad, Pakistan

Sr. Microsoft Dynamics 365 & Power Platform Technical Developer / Consultant

Sep 2020 – Jun 2023

Responsibilities:

- Led cross-functional teams in delivering end-to-end Dynamics 365 and Power Platform implementations aligned with client business goals.
- Designed and implemented custom CRM solutions using plug-ins, workflows, Power Pages, and integrations to support complex business processes.
- Built Model-Driven and Canvas Apps, and automated processes using Power Automate to improve operational efficiency.
- Implemented real-time integrations using Azure Functions and APIs to enhance scalability and system performance.
- Improved system reliability by optimizing C#, .NET, JavaScript, and Power FX components.
- Developed secure SSRS reports within Dynamics 365, ensuring role-based access and strong data security controls.
